Department of Public
Safety Presents**

Man in the Machine Rescue

AC Aaron Bolinger - Warsaw (IN) FD

Key topics include sizing up an incident; establishing safety zones; mitigating hazards; stabilizing and creating access and egress openings for rescue; disentangling and removing victims; and terminating an incident. The knowledge and skills acquired will prepare an emergency responder to extricate victim(s) from machinery in a safe and effective manner in accordance with AHJ policies and procedures

This course complies with the Operations Level response requirements found in NFPA 1006/1670.
