Time: 9:00am - 4:00pm                Benton Harbor, MI

Cost: $25 per student
(Refreshments Provided)
‡All proceeds go toward the Benton Harbor D.P.S. Training Fund‡

The Benton Harbor Department of Public Safety invites you to join us for a full day seminar presented by instructor, Bob Ruff. Lieutenant Ruff will begin the day with a very unique presentation on Fire Dynamics and Extinguishing Agents. This will be followed by a real world approach to implementing NIMS in smaller systems, such as Volunteer, Combination and P.S.O. departments. After an hour break for lunch, Ruff will deliver a presentation on smoke reading and scene assessment. This portion of the lecture will focus on key concepts from Brunacini’s Blue Card program. The first half of the afternoon will concentrate on making safe evaluations of incidents scenes as well as a uniform approach to on-scene size up radio reports. The afternoon will be wrapped up with application of the day’s concepts using virtual reality simulations of structure fires. All students will leave the seminar with a variety of handouts as well as a course completion certificate.

This seminar is designed to be beneficial to all levels of fire service professionals. Any firefighter who may be faced with the challenge of being the first to arrive on a fire scene, make a quick assessment of the chaos in front of them and deliver an under control, quality radio report will greatly benefit from this course. New Fire Officers, PSO’s and Chief Officers will walk away with an entirely new approach to risk management and incident action planning.

Class size is limited to 100 students and is expected to fill up fast, so register early.
